Chic and smart design

Smaller than ordinary portable air conditioners, the Portable Reverse Cycle Air Conditioner of German Pool is ideal for compact Hong Kong homes. The sleek, contemporary design not only saves space, it also gives your home a chic vibe, while the all-direction caster renders the air conditioner extra mobility. With no installation required, it can operate anywhere you want.

Apart from the easy-to-use, touch-screen smart control panel, the futuristic air conditioner comes with a multifunctional remote control and Window Kit, which allows the air conditioner to be placed outside the room, as such exhaust air and noise will be kept outside.

Eco and user-friendly features

A simplistic 2-in-1 cooling and heating system is appointed for the air conditioner, in which both cool and warm air is released from the same air outlet, allowing users to adjust accordingly.

With an enlarged coverage of 20-27 square meters and swing function, the air conditioner will form a superb 3D airflow that delivers cool or heated air to every corner of your home. Meanwhile, the independent dehumidifying function with powerful dehumidification up to 90 L/day, keeps the room fresh and crisp all year round, and the multi-function filtration thoroughly purifies the air to keep you away from pollutants.

Essential for environmentally conscious homes, the ECO mode of the air conditioner can optimize energy usage, achieving the desired temperature with the least electricity possible.

In addition, the self-evaporative system recycles condensing water to cool the condenser, saving energy and the need to constantly drain water. On top of that, the powerful R410A eco-friendly refrigerant can rapidly reduce room temperature by 8-10 °C. It is chlorine-free, which means it does not contribute to ozone depletion.

For safety, the system automatically enters a 3-minute buffer when switching from heating to cooling mode (and vice versa).

To optimize ventilation while turning on the air-conditioner, you can simply connect the exhaust hose and install the window seal-plate, or attach the adaptor louvers onto the adaptor of exhaust hose and place it outside the window or door. **German Pool** | Kowloon Flagship Store, Room 2-4, Upper G/F, Newport Centre, 116 Ma Tau Kok Road, To Kwa Wan | 2773 2888 | www.germanpool.com
