Smart Control of Hot Water

German Pool's innovative Smart Control iPad app reigns in a new era of tailor-making hot water from our most advanced instantaneous electric water heaters, for every member of the family.

The Smart Control home server links the Smart Control app with up to 10 compatible water heaters

100% made in Germany, the instantaneous electric water heaters (L-R): CEX21, DSX, GPI-M8

Ever opened a tap so hot that you had to jump out of the shower? Imagine a world where every tap opens to water at just the right temperature, as if the tap just knows exactly what you need. Well, that world has arrived.

German Pool's Smart Control system is the perfect companion to our comprehensive series of Instantaneous Electric Water Heaters. The heaters are 100% made in Germany and feature world-leading innovations in user- and eco-friendliness. When the Smart Control system is paired with German Pool's advanced heaters: DSX, DEX, DEX12, CEX9, CEX13, CEX21, CFX21, and GPI-M8, every user can pre-set their desired temperature for every purpose. Now, you can run your bath without checking its temperature; you can take a shower without the shock of the jet being too hot or too cold. Simply teach the Smart Control app your daily routine, and the app will instruct the water heaters to deliver the desired hot water at just the right time.

The Smart Control system integrates the controls for all compatible instantaneous electric water heaters. After setting the desired

temperature for shower, bath, hand-washing or dish washing, you can retrieve these settings using the intuitive dial on the iPad app. According to each individual's daily routine, the system automates the heater's start-up so that it is ready for dispensing water at the right temperature.

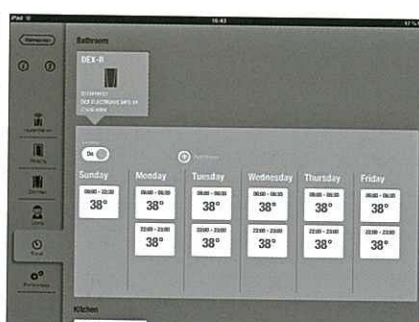

There will be no pre-heating, no waiting. No matter what it is you want to do: a cool post-gym shower, a quick rinse of a dish, a relaxing bath, or simply just lukewarm water for cleaning the floors... It is a smooth, simple process at your fingertips.

Furthermore, the app also lets you define saving targets, and compares that to your actual usage. The graphical summaries offer each individual member's water and energy consumption at a glance. Life-logging has never been easier.

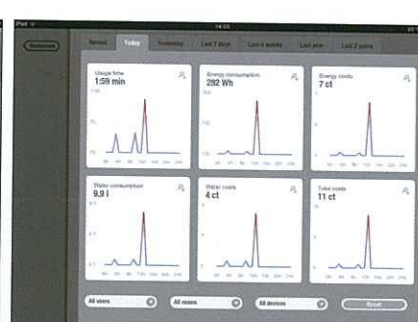

German Pool's instantaneous electric water heaters and Smart Control app realise a smart lifestyle at your fingertips. **German Pool Kowloon Flagship Store** | Room 2-4, UG/F, Newport Centre, 116 Ma Tau Kok Road, Tokwawan, Kowloon, Hong Kong | 2773 2828 | www.germanpool.com

▲ Hand-washing, shower, and bath temperatures can be retrieved on the iPad using this intuitive dial

▲ The water temperature can be adjusted according to each user's daily routine

▲ The Smart Control app offers graphical summaries of water and energy consumption of each individual user
